Guidance: Reporting free rider quantities

Dansk Producentansvar, 2026

As a producer, you may report free rider quantities retroactively for up to five years.

Under the "Free rider" menu item, you can see which reporting periods are open for reporting. For example, if the reporting period is stated as 1 January 2025 to 31 March 2025, this relates to the reporting of quantities put on the market in 2024. To begin a report, open the relevant reporting period and complete the reporting form.

Only quantities put on the market can be reported in the free rider reporting. It is therefore not possible to report waste quantities or treated quantities via the free rider process. The values reported through the free rider function are included in the annual report.

This guidance is based on the product area Electronics, but the same principles apply to the other product areas.

Log in to the Danish producer register

- Go to the Danish producer register and log in using your username and password. You can access the Danish producer register via:

https://virk.dk/myndigheder/stat/DPA/selvbetjening/The_Danish_producer_register/

The screenshot shows the website for the Danish Producer Responsibility Register. At the top, there is a breadcrumb trail: 'Forside' > 'Myndigheder' > 'Dansk Producentansvar' > 'The Danish producer register'. The page title is 'The Danish producer register' and there is a 'Kontakt' link. Below the title is a section for 'Introduktion'. The main text explains that companies must register if they put products on the market in Denmark. A blue button labeled 'Log onto the register' is highlighted with a red border. Below this, a list of requirements is provided, followed by a link to a Danish version of the page. At the bottom, there are three expandable sections: 'Why must I register?', 'What can I report?', and 'What is producer responsibility?'.

The Danish producer register

Introduktion

If your company puts products subject to producer responsibility on the market in Denmark, you must register in the producer register. The purpose of the producer responsibility system is to reduce the use of our limited resources.

You will need this:

- For Danish companies: MitID employee signature. If you use MitID Business, the company's MitID administrator must make sure to connect the right 'Producentansvar: Virksomhed' to your MitID
- Non-Danish companies should log in using username and password
- The company's contact person for producer responsibility
- Data on your product quantities
- Companies subject to producer responsibility must complete registration and payment of registration fee no later than 14 days before they start to put products subject to producer responsibility on the Danish market.

+ What is producer responsibility?

Report free rider quantities

You can only report free rider quantities that have not previously been reported for the relevant reporting period. This means that:

- you can only report once per category, end user, and battery chemistry per year
- it is not possible to amend or supplement a category that has already been reported via the free rider process.

1. Select the menu item "Reporting" and then "Free rider".
2. You can now select the reporting period for which you wish to report free rider quantities. For example, if the reporting period is stated as 1 January 2025 to 31 March 2025, this relates to the reporting of quantities put on the market in 2024.
3. Select the categories for which you need to report free rider quantities and click "Next".

Kategorier

Producent:

Her kan du se de kategorier, som virksomheden, du indberetter for, markedsfører. Hvis der mangler kategorier på listen, kan du tilføje dem i menupunktet Registrering. Vær opmærksom på, at du først kan indberette mængder for tilføjede kategorier i næstkommande indberetningsperiode.

Elektronik

Elektrisk og elektronisk udstyr defineres som alt udstyr, der er afhængigt af elektrisk strøm eller elektromagnetiske felter, samt udstyr, der er fremstillet til produktion, transmission og måling af elektriske strømme og elektromagnetiske felter. [Læs mere](#)

<input type="checkbox"/>	Elektronik
<input checked="" type="checkbox"/>	Udstyr til temperaturreglering
<input type="checkbox"/>	Udstyr med skærm eller monitor over 100 cm²
<input type="checkbox"/>	Lyskilder
<input checked="" type="checkbox"/>	Stort udstyr > 50 cm
<input type="checkbox"/>	Småt udstyr ≤ 50 cm
<input type="checkbox"/>	Småt IT-teleudstyr < 50 cm
<input type="checkbox"/>	Fotovoltaiske paneler (solcellepaneler)

Næste

4. Select the end user to which the reporting relates and enter the quantity put on the market. If the field is light grey, you are already registered for that end user, and it is therefore not possible to submit a report.

Indberettede mængder

Producent:

Her skal I indberette de mængder elektronik pr. kategori og slutbruger, som jeres virksomhed har markedsført sidste år.

For slutbruger erhverv har I desuden mulighed for at indberette den mængde elektronik, som I har tilkendegivet, at andre står for at håndtere, når det bliver til affald. Dette er de ansvarsoverdragne mængder.

Elektronik

— Udstyr til temperaturudveksling Success ✓

I skal vælge mindst én slutbruger pr. kategori. Hvis I ikke (længere) markedsfører kategorien, bedes I gå tilbage i flowet og fravælge kategorien.
