ANSVAR

## Registration of collective scheme for batteries and electronics

Dansk Producentansvar, November 2023

DPA is short for Dansk Producentansvar (Danish Producer Responsibility). DPA oversees administrative tasks associated with the rules on producer responsibility under the Danish environmental law regarding waste from electrical and electronic equipment, end-of-life batteries and accumulators, and end-of-life vehicles.

The producer responsibility for these waste types has authority in the Danish Environmental Protection Act. This Act translates into three Statutory Orders for the different waste types: the WEEE Order, the Battery Order, and the End-of-life Vehicles Order (the current statutory texts can be found on [www.producentansvar.dk](http://www.producentansvar.dk)).

The Danish Statutory Orders take offset in three EU directives for the same waste types: the so-called WEEE Directive, the Batteries Directive, and the ELV Directive. Also, these directives with exact titles and dates can be found on [www.producentansvar.dk](http://www.producentansvar.dk).

Producer responsibility rests on the principle that each producer or importer assumes responsibility for collection and management of WEEE, waste batteries, and end-of-life vehicles to the effect that products becoming waste are managed in an environmentally correct manner, with the highest possible utilisation of resources contained in such products.

Producers and importers are in the following referred to as producers as the rules applying to both types are the same.

In general, the following abbreviations are used: WEEE for waste electrical and electronic equipment, BAT for batteries and accumulators, ELV for end-of-life vehicles and FTT for filters for tobacco products.

Written information for DPA.....	3
Electronic information to DPA and users of <a href="http://www.producentansvar.dk">www.producentansvar.dk</a> .....	3

## Written information to DPA

The following information is submitted to DPA in connection with the registration of a collective scheme:

- Written request for registration of the collective scheme, signed by management
- Name, address and CVR/VAT number of the collective scheme
- List of contact information, including responsible management of the scheme

## Electronic information to DPA and users of [www.producentansvar.dk](http://www.producentansvar.dk)

When DPA has received the above information, the scheme will receive a user name and a password for the DPA website.

Enter the following on the website:

- Contact information. This information must be fully up to date at any time
- Presentation of categories and end-users for which the scheme is operating

A collective scheme is a Danish legal entity generally communicating with its stakeholders in Danish.

A collective scheme can be exempted from provision of financial guarantee for future costs of transport and management of household WEEE, cf. the WEEE Order. If the collective scheme does not comply with the requirements for exemption from provision of financial guarantee, the collective scheme must provide financial guarantee in the same way as individual compliers.

Read more about provision of financial guarantee under the Item Economy/Financial guarantee.

A collective scheme must be registered for three months prior to DPA's allocation of household WEEE and portable batteries. The allocation procedure takes place every year in mid-April.
