# Log into producer register

For foreign producers registering in the producer register for the first time.

Go to Producer register. You will find it through virk.dk:

[https://virk.dk/myndigheder/stat/DPA/selvbetjening/The\\_Danish\\_producer\\_register/](https://virk.dk/myndigheder/stat/DPA/selvbetjening/The_Danish_producer_register/)

Forside ▶ Myndigheder ▶ Dansk Producentansvar ▶ The Danish producer register

**The Danish producer register**

[Log onto the register](#)

If your company puts products subject to producer responsibility on the market in Denmark, you must register in the producer register. The purpose of the producer responsibility system is to reduce the use of our limited resources.

You will need this:

- For Danish companies: MitID employee signature. If you use MitID Business, the company's MitID administrator must make sure to connect the right 'Producentansvar: Virksomhed' to your MitID
- Non-Danish companies should log in using username and password
- The company's contact person for producer responsibility
- Data on your product quantities
- Companies subject to producer responsibility must complete registration and payment of registration fee no later than 14 days before they start to put products subject to producer responsibility on the Danish market.

Click [here for Danish](#).

## Producer Responsibility Register

Dansk Producentansvar  
Support: +45 39 15 51 61 · [Kontakt](#)

### Welcome to the Danish producer register

All businesses who put products covered by the Danish producer responsibility on the Danish market must register themselves in the Danish producer register. If you fail to register, you will not comply with the legislation on producer responsibilities when you sell your products in Denmark. You can read more about the producer responsibility on <https://producentansvar.dk/>.

### For producers

If your business puts products covered by the Danish producer responsibility on the market in Denmark, you must register your business in the Danish producer register.

Before starting the registration make sure to have the following information at hand:

- Company contact information, including contact person
- CVR number of the Danish business you wish to be your authorised representative (NB! It only applies to producers from EU/EEC countries)

6. Summary

## Product areas (selection of category)

In this list you must tick those categories the company puts on the market for each product area. You must select at least one category.

### Batteries

The producer responsibility for batteries covers all types of batteries and accumulators. This means that companies and importers putting batteries and accumulators on the market in Denmark must contribute to the organisation and financing of take-back and management of those batteries when they reach the end of their service life.
